This Product Highlights Sheet is an important document:

- It is a summary of the **salient information about the Fund**.
- You **MUST NOT invest in the Fund based on this Product Highlights Sheet alone**. Please read the prospectus dated 28 March 2023 and/or its supplementary(ies) prospectus or replacement prospectus of the **TA Asia Absolute Alpha Fund** (collectively known as "Prospectus") before deciding to make an investment. If you do not have a copy, please contact us to ask for one.
- You should not invest in the Fund if you do not understand it or are not comfortable with the accompanying risks.

This Product Highlights Sheet only highlights the key features and risks of the TA Asia Absolute Alpha Fund. Investors are advised to request, read and understand the disclosure documents before deciding to invest.

PRODUCT HIGHLIGHTS SHEET

TA ASIA ABSOLUTE ALPHA FUND

BRIEF INFORMATION OF THE PRODUCT

1. What is this product about?

TA Asia Absolute Alpha Fund (the "Fund") aims to generate long term positive return, which includes both capital appreciation and income.

Any material change to the investment objective of the Fund would require Unit Holder's approval.

PRODUCT SUITABILITY

2. Who is this product suitable for?

The Fund is suitable for investors who:-

- have Medium to Long Term investment horizon;
- have a moderate risk tolerance; and
- seek income and capital appreciation.

KEY PRODUCT FEATURES

3. What am I investing in?

Fund Category	Equity.							
Base Currency	United States Dollar ("USD").							
Launch Date	USD Class	MYR Class	AUD Hedged Class	SGD Hedged Class	GBP Hedged Class	MYR Hedged Class	RMB Hedged Class	EUR Hedged Class
	12 May 2020							9 June 2022
Asset Allocation	<ul style="list-style-type: none"> • Minimum of 60% to 98% of the Fund's NAV in equities and equity-related securities; • At least 2% of the Fund's NAV in Liquid Assets; and • Maximum of 30% of the Fund's NAV in derivatives. 							
Performance Benchmark	<p>The performance of this Fund cannot be compared directly with any specific publicly available benchmark. However, the Fund has a target return of 8% per annum.</p> <p><u>Note:</u></p> <ul style="list-style-type: none"> ➤ This is not a guaranteed return and is only a measurement of the Fund's performance. The Fund may not achieve the target return in a particular financial year but targets to achieve this over Medium to Long Term. 							
Investment Policy & Strategy	<p>The Fund seeks to achieve its investment objective by investing primarily in equities and equity-related securities in Asia. The remaining of the Fund's NAV will be invested in Liquid Assets.</p> <p>The investment universe will include, but is not limited to, equities and equities-related securities listed on exchanges in the Asia Pacific region, as well as equities and equities-related securities of companies which have operations in, exposure to, or derive part of their revenue from the Asia Pacific region, wherever they may be listed. The Fund will have the flexibility to invest in collective investment schemes which is in line with the Fund's investment objective. The Fund's investment in China "A" Shares listed on PRC stock exchanges may be made through the Stock Connects and/or any other means as may be permitted by the relevant regulations from time to time, for up to 35% of the Fund's NAV.</p> <p>The Fund may focus on growth companies with sound economic fundamentals to generate alpha (i.e. excess return) through fundamental company and industry research and by applying a bottom-up approach. This approach seeks to identify companies with either proven track records and durable competitive strengths or growth potential that is not fully reflected in the price of its securities. The stock selection process for the investments takes various factors into account, including but not limited to the potential maximum loss under adverse market conditions.</p> <p>The Fund may use financial derivative instruments ("FDIs") (including, without limitation, futures, options and forwards) for hedging and efficient portfolio management purposes.</p> <p>Although the Fund is actively managed, how active or the frequency of its trading strategy will very much depend on market opportunities.</p> <p>The Fund may take temporary defensive positions that may be inconsistent with the Fund's strategy in attempting to respond to adverse economic, political or any other market conditions. In such circumstances, the Fund may temporarily hold up to 100% of the Fund's assets in Liquid Assets which may be inconsistent with the Fund's objective and asset allocation strategy as a defensive strategy.</p> <p>The investment management of the Fund has been delegated to an external investment manager, Fullerton Fund Management Company Ltd.</p>							

	<p>Derivatives The Fund may use derivatives for any of the following purposes as described below:</p> <p>Hedging The Fund may employ currency hedging strategies to hedge the foreign currency exposure to manage the currency risk of the Classes not denominated in the Base Currency. The Fund may also utilise derivative instruments such as futures or options for the purpose of hedging the Fund's exposure to particular markets, sectors or currencies (e.g., equity index).</p> <p>Efficient Portfolio Management Efficient portfolio management means the cost-effective use of derivatives with the aim of reducing certain risk associated with the Fund's investments, reducing costs or to generate additional capital or income. The risks generated will be consistent with the Fund's risk profile and be adequately captured by the risk management process.</p> <p>Types of derivatives the Fund can use and the rationale of their use: The Fund may use a range of derivatives to achieve a particular investment outcome such as:</p> <table border="1"> <thead> <tr> <th>FDIs</th> <th>Descriptions of FDIs</th> <th>Rationale of their Use</th> </tr> </thead> <tbody> <tr> <td>Options</td> <td>The Fund may invest in call or put options on equities, indices, currencies, futures contracts or other instruments.</td> <td>The Fund may use options as a substitute for investing directly in securities (e.g. call options) and for managing equity market risk (e.g. put options) and for gaining or adjusting exposure to particular markets, sectors or currencies (e.g. options on equity index/sector futures).</td> </tr> <tr> <td>Futures</td> <td>The Fund may enter into listed futures contracts on equities, indices, currencies or other instruments.</td> <td>The Fund may use futures for managing equity market risk (e.g. equity sector futures) and for gaining or adjusting exposure to particular markets, sectors or currencies (e.g. equity index/sector futures).</td> </tr> <tr> <td>Forwards</td> <td>Typically foreign exchange contracts.</td> <td>The Fund may enter into forward contract to hedge the foreign currency for the hedged Classes.</td> </tr> </tbody> </table>								FDIs	Descriptions of FDIs	Rationale of their Use	Options	The Fund may invest in call or put options on equities, indices, currencies, futures contracts or other instruments.	The Fund may use options as a substitute for investing directly in securities (e.g. call options) and for managing equity market risk (e.g. put options) and for gaining or adjusting exposure to particular markets, sectors or currencies (e.g. options on equity index/sector futures).	Futures	The Fund may enter into listed futures contracts on equities, indices, currencies or other instruments.	The Fund may use futures for managing equity market risk (e.g. equity sector futures) and for gaining or adjusting exposure to particular markets, sectors or currencies (e.g. equity index/sector futures).	Forwards	Typically foreign exchange contracts.	The Fund may enter into forward contract to hedge the foreign currency for the hedged Classes.
FDIs	Descriptions of FDIs	Rationale of their Use																		
Options	The Fund may invest in call or put options on equities, indices, currencies, futures contracts or other instruments.	The Fund may use options as a substitute for investing directly in securities (e.g. call options) and for managing equity market risk (e.g. put options) and for gaining or adjusting exposure to particular markets, sectors or currencies (e.g. options on equity index/sector futures).																		
Futures	The Fund may enter into listed futures contracts on equities, indices, currencies or other instruments.	The Fund may use futures for managing equity market risk (e.g. equity sector futures) and for gaining or adjusting exposure to particular markets, sectors or currencies (e.g. equity index/sector futures).																		
Forwards	Typically foreign exchange contracts.	The Fund may enter into forward contract to hedge the foreign currency for the hedged Classes.

Distribution Policy	<p>Distribution (if any), may be declared in our absolute discretion on a quarterly basis. The distribution may be made from (1) realised income, (2) realised gains, (3) unrealised income, (4) unrealised gains, (5) capital or (6) a combination of any of the above to provide a consistent level of distribution to Unit Holders.</p> <p>Please refer to the Prospectus for further details on distribution policy and the risk associated to distribution out of capital.</p>																			

Note:

Please refer to sections "The Fund" and "Transaction Information" of the Prospectus for further information.

4. Who am I investing with?

Manager	TA Investment Management Berhad (Registration Number: 199501011387 (340588-T))
Trustee	CIMB Commerce Trustee Berhad (Registration Number: 199401027349 (313031-A))
External Investment Manager	Fullerton Fund Management Company Ltd (UEN: 200312672W)

5. What are the possible outcomes of my investment?

The Fund invests primarily in equities and equity-related securities in Asia. The performance of the Fund would be dependent on the investments of the Fund and reliant on the External Investment Manager's expertise in managing the Fund to meet its investment objective.

The investors may gain from the appreciation of Unit price as a result of the increase in value of the underlying and/or accrual of interest earned. However, investment involves risk. The value of the Fund may rise or fall. Distribution (if any), may be declared in our absolute discretion on a quarterly basis. These risk factors, among others, may cause you to lose part or all of your investment.

KEY RISKS

6. What are the key risks associated with this product?

General risks of investing in a unit trust fund:
Market Risk Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the Fund's NAV.
Manager Risk This risk refers to the day-to-day management of the Fund by the Manager which will impact the performance of the Fund. For example, investment decisions undertaken by the Manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or Guidelines due to factors such as human error or weaknesses in operational processes and systems may adversely affect the performance of the Fund.
Inflation Risk Inflation risk is the risk that an investor's investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce investor's purchasing power even though the value of the investment in monetary terms has increased.
Non-compliance Risk This risk arises from non-compliance with laws, rules, regulations, prescribed practices and internal policies and procedures by the Manager. For example, the Manager may fail to comply with internal policies and procedures due to internal factors such as oversight, human error and/or system error. This risk may also occur indirectly due to the imposition and/or amendment to the relevant regulatory frameworks, laws, rules and other prescribed practices affecting the Fund. The Manager has put in place internal controls to ensure that comprehensive and timely compliance monitoring is undertaken.
Loan Financing Risk This risk occurs when investors take a loan or financing to finance their investment. The inherent risk of investing with borrowed money includes investors being unable to service the loan repayments. In the event Units are used as collateral, investors may be required to top-up the investors' existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower NAV per Unit as compared to the NAV per Unit at the point of purchase towards settling the loan.
Operational Risk Apart from a market disruption event, system interruption can also impact processes when there is an interruption in the flow of information needed for making qualified decisions where decisions are made based on accurate flow of information with operated system in managing the Fund. These disruptions may impact the performance of the Fund, the settlement of trades in the Fund and may also affect the investor's transactions with the Fund. The Manager has put in place internal controls to manage some of these disruptions such as business continuity plans. However, investors should note that not all circumstances can be prepared for nor anticipated. In such circumstances, the Manager in consultation with the Trustee will take appropriate measures to safeguard the Unit Holders' interests.
Suspension Risk The Manager may, in consultation with the Trustee and having considered the interests of the Unit Holders, suspend the redemption of Units where it is impractical for the Manager to calculate the NAV of the Fund due to the Manager being unable to determine the market value or fair value of a material portion of the Fund's investments. Upon suspension, the Fund will not be able to pay Unit Holders' redemption proceeds in a timely manner and Unit Holders will be required to remain invested in the Fund for a longer period. In such a scenario, Unit Holder's investments will continue to be subjected to risk factors inherent to the Fund.
Specific risks associated to the Fund:
External Investment Manager's Risk The investments of Fund are managed by the External Investment Manager, the Manager has no control over the External Investment Manager's investment technique, knowledge or management expertise. In the event of mismanagement of the Fund by the External Investment Manager, the NAV of the Fund would be affected negatively. The Fund would also be affected should there be any unresolved dispute between the Manager and the External Investment Manager. Although the probability of such occurrence is minor, should the situation arise the Manager reserves the right to seek an alternative external investment manager to replace the External Investment Manager.
Equity and Equity-Related Securities Risk Prices of equities and equity-related securities may be influenced and affected by many micro and macro factors such as economic, political, market, and company-specific changes. Such changes may adversely affect the value of the equities and equity-related securities which can go up and down. Additionally, different industries, financial markets, and securities can react differently to these changes. This may give rise to fluctuations in the Fund's value and can adversely affect the overall portfolio performance in any given period, resulting in significant losses.
Financial Derivative Instruments Risk FDIs may be used where the relevant investment guidelines permit. The successful use of such instruments depends on the ability to accurately predict movements in stock prices, interest rates, currency exchange rates or other economic factors and the availability of liquid markets. If the External Investment Manager's prediction is incorrect, or if the FDIs do not work as anticipated, greater losses may be incurred than had FDIs not been used. While some strategies involving FDIs can reduce the risk of loss, they can also reduce the opportunity for gain or even result in losses by offsetting favourable price movements in other investments. This results in likelihood of high volatility of the NAV per Unit of the Fund. Investments in FDIs may require the deposit of an initial margin and additional deposits of margin on short notice if the market moves against the investment positions. If no provision is made for the required margin within the prescribed time, FDI investments

may be liquidated at a loss.

Other risks in using FDIs include the risk of mispricing or improper valuation of FDIs and the inability of FDIs to correlate perfectly with underlying assets, rates and indices. Many FDIs, in particular privately negotiated FDIs, are complex and often valued subjectively. Improper valuations can result in increased cash payment requirements to counterparties or a loss of value to the Fund. Also, the value of FDIs may not correlate perfectly, or at all, with the value of the assets, reference rates or indices they are designed to closely track. In addition, the use of FDIs may attract taxes for short-term capital gains than had FDIs not been used.

For hedged classes, the Manager may use forward contract for the purpose of hedging the foreign currency movement against the Base Currency. In particular for those forward transactions that traded over-the-counter, there is an increase in counterparty risk. If a counterparty defaults, the Fund may not get the expected payment or delivery of assets. This may result in the loss of the unrealised profit. The investment in FDIs is used to reduce currency fluctuation risk for the Fund.

Currency Risk

As the investments of the Fund may be denominated in currencies other than the Base Currency, any fluctuation in the exchange rate between the Base Currency and the currencies in which the investments are denominated may have an impact on the value of these investments. Investors should be aware that if the currencies in which the investments are denominated depreciate against the Base Currency, this will have an adverse effect on the NAV of the Fund in the Base Currency and vice versa. Investors should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

The Fund may offer Units in multiple currency Classes, which will expose the Unit Holder to currency risk in respect to the currency of Units of a Class other than the Base Currency.

(i) Currency risk at the hedged Class level

Investors in the hedged Classes may be subjected to currency risk due to imperfect hedging by the Manager when the Manager hedges the respective currency against the Base Currency. However, investors should note that hedging is subject to a minimum investment size of entering into a forward contract and the unhedged portion of the respective hedged Classes may still be affected by the exchange rate movement which may result in fluctuation of NAV of the respective hedged Classes. In addition, investors in the hedged Classes should note that by employing this hedging, investors would not be able to enjoy the additional currency gains when USD moves favourably against the currency of the hedged Classes. Additional transaction costs of hedging will also have to be borne by investors in these Classes.

(ii) Currency risk at the non-hedged Class level

For investors in the non-hedged Classes, the impact of the exchange rate movement between the Base Currency and the currency of the respective Classes (other than USD Class) may result in a depreciation of the investor's holdings as expressed in the Base Currency.

Country Risk

Investments of the Fund in foreign markets may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. This may impact on the prices of the Fund's investment in those countries and consequently may also adversely affect the Fund's NAV.

Liquidity Risk

Liquidity risk exists when particular investments are difficult to purchase or sell. The Fund's investment in illiquid securities may reduce the returns of the Fund because it may be unable to sell the illiquid securities at an advantageous time or price. Investments in securities with substantial market risk tend to have the greatest exposure to liquidity risk. Illiquid securities may be highly volatile and difficult to value. To mitigate the liquidity risk, the External Investment Manager will monitor the minimum threshold for daily liquidity of the investment of the Fund. In the event the investments of the Fund may not be able to be liquidated within a specific period of time, or may be sold below their valuation due to insufficient liquidity in the markets, this will negatively impact the NAV of the Fund and the investments of the Unit Holders.

Concentration Risk

The Fund may not be well diversified in terms of the number of holdings and the number of issuers of securities that the Fund invests in. Consequently, the price movement of the Fund can be more volatile than a fund which is more diversified.

Counterparty Risk

The Fund will be exposed to credit risk of the counterparties for investments in financial derivative instruments with the financial institutions for hedging purposes. Any default by the counterparty would affect the NAV of the Fund. The Fund will only enter into financial derivatives instruments that are issued by counterparty with a minimum long-term credit rating of investment grade (including gradation and subcategories). Where the counterparty is not rated, the counterparty must be guaranteed by the parent company of the counterparty which has an investment grade credit rating (including gradation and subcategories). In the event where the rating of the counterparty falls below the minimum required, or the counterparty ceases to be rated, analysis will be conducted to assess the impact of unwinding the affected trades and replacement cost. We shall, within six (6) months or sooner, if the Trustee considers it to be in the best interests of the Unit Holders, take the necessary action to ensure that the requirements are complied with.

Distribution Out of Capital Risk

Distribution may be paid out of capital when the realised gains or realised income of the Fund is insufficient to pay a distribution. Unit Holders should note that the payment of distribution out of capital represents a return or withdrawal of part of the amount from any capital gains attributable to the original investment. Such distribution may result in an immediate decrease in the NAV per Unit of the Class and the capital of the Fund which is available for investment in the future. As a result, capital growth may be reduced and a high distribution yield from distribution out of capital does not imply a positive or high return on Unit Holders' total investments.

Note:

Please refer to section "Risk Factors" of the Prospectus for further information. Please note that this is part of the specific risks associated to the Fund only. Unit Holders are required to refer to the full risks associated to the Fund in the Prospectus such as Taxation Risk, Stock Connects Risk, Risk of Investing in Emerging and Less Developed Markets, Political and Economic Risk, Small Capitalisation Companies Risk, Settlement Risk, IPO Securities Risk and Collective Investment Scheme Risk.

Please be advised that if an investor invests in Units through an IUTA which adopts the nominee system of ownership, the investor would not be considered to be a Unit Holder under the Deed as the investor's name will not appear in the register of Unit Holders. The investor may consequently not have all the rights ordinarily exercisable by a Unit Holder (for example, the right to call for a Unit Holders' meeting and to vote thereat).

FEE & CHARGES¹

7. What are the fees and charges involved?

Fees and charges related to the Fund:

Sales Charge²	Up to 5.50% of the NAV per Unit of the Class is imposed either by IUTAs, unit trust consultants or the Manager.
Redemption Charge	No redemption charge will be imposed for each redemption.
Switching Fee	No switching fee will be imposed for each switch. However, Unit Holders will have to pay the difference in sales charge, if any, when switching from the Class to any other funds managed by us.
Transfer Fee	No transfer fee will be imposed for each transfer.
Annual Management Fee³	Up to 1.80% per annum of the NAV per Unit of the Fund, calculated and accrued on a daily basis.
Annual Trustee Fee	0.04% per annum of the NAV of the Fund subject to a minimum of RM12,000 per annum calculated and accrued daily (excluding foreign custodian fees and charges) and is to be charged to the Fund by the Trustee.

Notes:

- We may for any reason and at any time, waive or reduce: (a) any fees (except the Trustee's fee); (b) other charges payable by you in respect of the Fund; and/or (c) transactional values including but not limited to the Units or amount, for any Unit Holder and/or investments made via any distribution channels or platform. Unit Holders and/or the Fund, shall be responsible for any taxes and/or duties chargeable in respect of all applicable fees, charges and expenses which may be imposed by the government or other authorities from time to time as provided in the Prospectus.
- All sales charge is to be rounded to two (2) decimal points. The Manager reserves the right to waive and/or reduce the sales charge from time to time at its absolute discretion. Investors may negotiate with their preferred distribution channel for a lower sales charge. Investment through the distribution channel shall be subjected to their respective terms and conditions.
- We may, at our own discretion, from time to time, charge an annual management fee that is lower than that stated above.

Please refer to section "Fees, Charges and Expenses" of the Prospectus for further information.

YOU SHOULD NOT MAKE PAYMENT IN CASH TO A UNIT TRUST CONSULTANT OR ISSUE A CHEQUE IN THE NAME OF A UNIT TRUST CONSULTANT.

8. How often are valuations available?

The Fund will be valued on a daily basis, which is on the Valuation Day.

As the Fund may invest in foreign markets, the valuation of the Units in respect of a particular Valuation Day can only be carried out on the following Business Day at the close of business of the last relevant foreign market in which the Fund invests in.

If the foreign market in which the Fund is invested therein is closed for business, the Manager will value the investment based on the latest available price as at the day the particular foreign market was last opened for business.

Price of the Fund will be published on next Business Day and the Unit Holders may obtain the latest price of the Fund from our website at www.tainvest.com.my or Federation of Investment Managers Malaysia (FIMM)'s website.

9. How can I exit from this investment and what are the risks and costs involved?

Cooling-off Policy	<ul style="list-style-type: none"> There is a cooling-off period of six (6) Business Days from the day your application is accepted or deemed to be accepted by the Manager. Within these six (6) Business Days, you have a right to request for withdrawal of the investment. The refund for every Unit held by you pursuant to the exercise of your cooling-off right would be the sum of: <ol style="list-style-type: none"> if the NAV per Unit on the day the Units were first purchased ("original price") is higher than the price of a Unit at the point of exercise of the cooling-off right ("market price"), the market price at the point of cooling-off; or if the market price is higher than the original price, the original price at the point of cooling-off; and the sales charge per Unit originally imposed on the day the Units were purchased. The proceeds would generally be refunded within seven (7) Business Days of receiving the request for withdrawal. 						
Redemption of Units	<ul style="list-style-type: none"> Redemption of Units can be made by completing a transaction form available from any of our offices or by sending written instructions to any of our offices on any Business Day. Any valid redemption request received by our head office or any of our business centres on or before 4.00 p.m. on a Business Day will be processed based on the NAV per Unit calculated at the end of the Business Day. Any redemption request received by us after 4.00 p.m. will be deemed to have been received on the next Business Day. If a redemption request is received by us on non-Business Day, such redemption request will be processed based on the NAV per Unit calculated at the close of the next Business Day. Redemption proceeds will be paid to you within the period set out below based on the respective Classes. <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: left;">Classes</th> <th style="text-align: left;">Payment of Redemption Proceeds</th> </tr> </thead> <tbody> <tr> <td>USD Class, MYR Class, MYR Hedged Class</td> <td>Within ten (10) Business Days from the date the transaction form is received.</td> </tr> <tr> <td>AUD Hedged Class, SGD Hedged Class, GBP Hedged Class, RMB Hedged Class, EUR Hedged Class</td> <td>Within eleven (11) Business Days from the date the transaction form is received.</td> </tr> </tbody> </table>	Classes	Payment of Redemption Proceeds	USD Class, MYR Class, MYR Hedged Class	Within ten (10) Business Days from the date the transaction form is received.	AUD Hedged Class, SGD Hedged Class, GBP Hedged Class, RMB Hedged Class, EUR Hedged Class	Within eleven (11) Business Days from the date the transaction form is received.
Classes	Payment of Redemption Proceeds						
USD Class, MYR Class, MYR Hedged Class	Within ten (10) Business Days from the date the transaction form is received.						
AUD Hedged Class, SGD Hedged Class, GBP Hedged Class, RMB Hedged Class, EUR Hedged Class	Within eleven (11) Business Days from the date the transaction form is received.						

Note:

Please refer to section "Transaction Information" of the Prospectus for further information.

FUND PERFORMANCE

The basis of calculating and assumption made in calculating the returns:

$$\text{Percentage Growth} = \frac{N^1 - N^2}{N^2} \times 100$$

N¹ = NAV on the end of the period

N² = NAV on the beginning of the period

$$\text{* Average Total Return} = \frac{\text{Total Sub Period Returns}}{\text{Number of Sub Periods}}$$

$$\text{* Annual Total Return} = (1 + \text{Cumulative Return})^{N^3/N^4} - 1$$

N³ = Number of periods per year

N⁴ = Total number of periods

Factor in for unit split and distribution paid out (if any during the period)

Average Total Return as at 30 April 2024
