4. Who am I investing with?

Manager	TA Investment Management Berhad (Registration Number:199501011387 (340588-T))
Trustee	CIMB Commerce Trustee Berhad (Registration Number: 199401027349 (313031-A))

5. What are the possible outcomes of my investment?

This is a wholesale feeder fund where the Target Fund seeks to systematically capture a wide range of market behaviours through diversification across investment style, sector, and time horizon. The Target Fund’s strategies can be classified broadly into at least three categories, including systematic macro, short term, and momentum (e.g. trend following), which may be applied across traditional asset classes i.e. equities and equity-related securities, interest rates, fixed income, financial indices, credit and currencies. The Target Fund will enter into an unfunded total return swap to provide exposure to the economic performance of a basket of FDI (the “Portfolio Total Return Swap”).

The performance of the Fund would be dependent on the investments of the Target Fund and reliant on the Portfolio Manager’s expertise in managing the Target Fund to meet its investment objective.

The investors may gain from the appreciation of Unit price as a result of the increase in value of the underlying and/or accrual of profit earned. However, investment involves risk. The value of the Fund may rise or fall. Distribution is incidental and at the Manager’s discretion. These risk factors, among others, may cause you to lose part or all of your investment.

KEY RISKS

6. What are the key risks associated with this product?

Specific risks related to the Fund:	
Concentration Risk	The Fund is exposed to concentration risk as it is investing a minimum of 85% of its NAV into the Target Fund. Hence, this would result in the Fund being exposed to the risk of its NAV declining when the Target Fund’s net asset value declines. All investment decisions on the Target Fund are left with the Portfolio Manager and the Fund’s performance is fully dependent on the performance of the Target Fund.
Currency Risk	<p>The Fund may offer Units in multiple currency Classes, which will expose the Unit Holder to currency risk in respect to the currency of Units of a Class other than the Base Currency.</p> <p>(i) Currency risk at the hedged Class level Investors in the hedged Classes may be subjected to currency risk due to imperfect hedging by the Manager when the Manager hedges the respective currency against the Base Currency. However, investors should note that hedging is subject to a minimum investment size of entering into a forward contract and the unhedged portion of the respective hedged Classes may still be affected by the exchange rate movement which may result in fluctuation of NAV of the respective hedged Classes. In addition, investors in the hedged Classes should note that by employing this hedging, investors would not be able to enjoy the additional currency gains when Base Currency moves favourably against the currency of the hedged Classes. Additional transaction costs of hedging will also have to be borne by the investors in these hedged Classes.</p> <p>(ii) Currency risk at the non-hedged Class level For investors in the non-hedged Classes, the impact of the exchange rate movement between the Base Currency and the currency of the respective non-hedged Classes (other than USD Class) may result in a depreciation of the investor’s holdings as expressed in the Base Currency.</p>
Counterparty Risk	Investors in the hedged Classes of the Fund are subject to counterparty risk on the derivatives contract that may be entered into with the financial institutions for the purpose of hedging strategy. Hence, any default or downgrade in rating by the counterparty may affect the NAV of the Fund. In mitigating this risk, the Manager will carry out stringent selection process on the counterparty prior to entering the derivatives contract with the counterparty.
Country Risk	The Fund invests in the Target Fund which is domiciled in Ireland. Any adverse changes in the economic fundamentals, social and political stability, currency movements and foreign investments policies in Ireland may have an impact on the prices of the Target Fund and consequently may also affect the Fund’s NAV.

Distribution Out of Capital Risk	Distribution is incidental and at the Manager's discretion. Distribution may be paid out of capital when the realised gains or realised income of the Fund is insufficient to pay a distribution. Unit Holders should note that the payment of distribution out of capital represents a return or withdrawal of part of the amount from any capital gains attributable to the original investment. Such distribution may result in an immediate decrease in the NAV per Unit of the Class and in the capital that the Fund which is available for investment in the future. As a result, capital growth may be reduced and a high distribution yield from distribution out of capital does not imply a positive or high return on Unit Holders' total investments.
Temporary Suspension of Collective Investment Scheme Risk	If the right of the Fund to redeem its shares of the Target Fund is temporarily suspended, the Fund may also be affected if the Fund does not have sufficient liquidity to meet redemption request from Unit Holder. During the suspension period, there will be no NAV per Unit available and hence, any application for subscription, redemption or switching of Units received by the Manager during the suspension period will only be accepted and processed on the next Business Day after the cessation of the suspension. Unit Holders will be notified of the suspension and when the suspension is lifted.
Fund Management of the Target Fund Risk	<p>We have exercised due skill and care in selecting the Target Fund. However, we do not have control over the management of the Target Fund and there is no guarantee that the investment objective of the Target Fund will be met. This may affect the value of the Unit Holders' investments in the Fund.</p> <p>The Target Fund may change its investment objective which may become inconsistent with the investment objective of the Fund. In such instances, we will replace the Target Fund with other collective investment scheme which we consider to be more appropriate in meeting the investment objective of the Fund. Any changes on the replacement of the Target Fund would require the Unit Holders' approval.</p>

Note:

Please refer to section "Risk Factors" of the Information Memorandum, including specific risks related to the Target Fund for further information.

It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. The various assets classes generally exhibit different levels of risk.

You are recommended to read the whole Information Memorandum to assess the risks associated to the Fund. If necessary, you should consult your adviser(s) for a better understanding of the risks.

Please be advised that if a Sophisticated Investor invests in units through an IUTA which adopts the nominee system of ownership, the Sophisticated Investor would not be considered to be a Unit Holder under the Deed as the Sophisticated Investor's name will not appear in the register of Unit Holders. the Sophisticated Investor may consequently not have all the rights ordinarily exercisable by a Unit Holder (for example, the right to call for a Unit Holders' meeting and to vote thereat).
