

TA Inflation Multi-Asset Fund (TAIMAF) - USD Class

Information as at 30 August 2023 (based on NAV to NAV with distributions reinvested)

Fund Objective

The Fund aims to achieve capital preservation over time by investing in a collective investment scheme which predominantly invest in a diversified portfolio of inflation-related assets.

Investor Profile

The Fund is suitable for Sophisticated Investors who are :

- looking for a higher long-term after inflation return from their investments;
- willing to accept the increased risk of investing in inflation related assets;
- seeking to mitigate the negative effects of higher inflation and those who want to diversify their portfolios away from nominal fixed income securities (non-inflation related) and stocks.

Investment Strategy

The Fund seeks to achieve its investment objective by investing a minimum of 85% of the Fund's NAV in the Target Fund and the remainder of the Fund's NAV will be invested in Liquid Assets.

The Fund may employ currency hedging strategies to hedge the foreign currency exposure to manage the currency risk of the hedged Classes which are not denominated in the Base Currency.

If and when the Manager considers the investment in the Target Fund is unable to meet the investment objective of the Fund, the Manager may replace the Target Fund with another collective investment scheme that is deemed more appropriate. As this is a feeder fund, the Manager does not intend to take a temporary defensive position for the Fund during adverse market, economic and/or any other conditions. However, in such conditions the Manager may decide to temporarily lower the asset allocation or exposure of the Fund in the Target Fund to below 85% of the Fund's NAV should the Manager decide that this will be in the best interest of the Unit Holders.

Currently, the Fund invests in Institutional Class Accumulation (I-Acc) shares of the Target Fund. The Fund may change its entire investment into another class of the Target Fund (which must be denominated in the same currency) if the Manager is of the opinion that the change is in the interest of the Unit Holders. If the Manager wishes to effect such change, the Manager will seek concurrence from the Trustee and the Unit Holders will be notified before implementation. Please refer to Chapter 3, The Information on PIMCO Funds: Global Investors Series plc – Inflation Multi-Asset Fund (“Target Fund”) for details of the Target Fund. Investors may obtain a copy of the Target Fund's Prospectus from the Manager upon request.

TA Inflation Multi-Asset Fund (TAIMAF) - GBP Hedged Class

Information as at 30 August 2023 (based on NAV to NAV with distributions reinvested)

Fund Objective

The Fund aims to achieve capital preservation over time by investing in a collective investment scheme which predominantly invest in a diversified portfolio of inflation-related assets.

Investor Profile

The Fund is suitable for Sophisticated Investors who are :

- looking for a higher long-term after inflation return from their investments;
- willing to accept the increased risk of investing in inflation related assets;
- seeking to mitigate the negative effects of higher inflation and those who want to diversify their portfolios away from nominal fixed income securities (non-inflation related) and stocks.

Investment Strategy

The Fund seeks to achieve its investment objective by investing a minimum of 85% of the Fund's NAV in the Target Fund and the remainder of the Fund's NAV will be invested in Liquid Assets.

The Fund may employ currency hedging strategies to hedge the foreign currency exposure to manage the currency risk of the hedged Classes which are not denominated in the Base Currency.

If and when the Manager considers the investment in the Target Fund is unable to meet the investment objective of the Fund, the Manager may replace the Target Fund with another collective investment scheme that is deemed more appropriate. As this is a feeder fund, the Manager does not intend to take a temporary defensive position for the Fund during adverse market, economic and/or any other conditions. However, in such conditions the Manager may decide to temporarily lower the asset allocation or exposure of the Fund in the Target Fund to below 85% of the Fund's NAV should the Manager decide that this will be in the best interest of the Unit Holders.

Currently, the Fund invests in Institutional Class Accumulation (I-Acc) shares of the Target Fund. The Fund may change its entire investment into another class of the Target Fund (which must be denominated in the same currency) if the Manager is of the opinion that the change is in the interest of the Unit Holders. If the Manager wishes to effect such change, the Manager will seek concurrence from the Trustee and the Unit Holders will be notified before implementation. Please refer to Chapter 3, The Information on PIMCO Funds: Global Investors Series plc – Inflation Multi-Asset Fund (“Target Fund”) for details of the Target Fund. Investors may obtain a copy of the Target Fund's Prospectus from the Manager upon request.
