Past performance is not necessarily indicative of future performance. Unit prices and investment returns may go down, as well as up.

TA Rainbow Income Fund 12

(For the financial period ended 31 December 2022)

The basis of calculating and assumption made in calculating the returns:

$$\text{Percentage Growth} = \frac{N^1 - N^2}{N^2} \times 100$$

N^1 = NAV on the end of the period

N^2 = NAV on the beginning of the period

$$\text{* Average Total Return} = \frac{\text{Total Sub Period Returns}}{\text{Number of Sub Periods}}$$

$$\text{** Annual Total Return} = (1 + \text{Cumulative Return})^{N^3 / N^4} - 1$$

N^3 = Number of periods per year

N^4 = Total number of periods

Factor in for unit splits and distributions paid out (if any during the period)

Market Review

2022 saw stocks gyrating wildly as the United States (US) Federal Reserve (Fed) pivoted from its zero-rate policy and announced that rates would start to rise. This was exacerbated by geopolitical tensions over the Russia-Ukraine war which aggravated the shortages and supply chain issues in certain critical goods and key commodities. Despite the volatility, markets rebounded in July 2022 as investors' fears about the aggressive pacing of Fed rate hikes waned.

However, the recovery was cut short, in August 2022, over hawkish comments from Fed officials signalling that interest rate hikes are not going away anytime soon amidst lower-than-expected consumer sentiment and the Fed's seven consecutive interest rate hikes of 2022, pushing its benchmark rate to 4.5% on 14 December 2022. Meanwhile, the Bank of England and European Central Bank each raised their policy rates by 50 basis points at their policy meetings at the end of 2022. Developments in other major economies included China's loosening of its Coronavirus Disease of 2019 (COVID-19) restrictions in December 2022 which included removal of testing requirements, earlier than the March 2023 to April 2023 timeline widely anticipated by market participants. The volatile market led to the Fund's underlying assets retracing earlier gains.

The market review and outlook commentaries of the underlying assets of the Fund are as follows:

Amiral Gestion Sextant Grand Large

The Sextant Grand Large is a diversified fund with 0% to 100% exposure to equities depending on the long-term valuation of equity markets. Stocks are then selected individually from across the world with no constraints imposed by a benchmark index. Assets not invested will be invested in bonds selected using the same approach, and also in money-market instruments.

The net equity exposure varies according to the adjusted market valuation for the cycle (Shiller PE ratios). Excluding all macroeconomic and stock market effects, the more expensive the markets, the less the fund will be exposed and vice versa. At the end of December 2022, the net exposure to the equity market was up to 33%. This was made up of a 54% gross exposure, and hedging instruments accounting for nearly 21% of the fund. This level of hedging is at its highest today because of the polarisation of market valuations between small and large stocks, with the latter being more expensive. We therefore believe it is worthwhile to overweight small caps beyond our target net exposure of 33% to reach 54% gross exposure by returning to the target exposure via hedging on large indices. Bonds represent 25% of the fund, increasingly steadily over the course of the year to take advantage of the more favourable credit spreads. The rest of the fund consists of liquid assets in the broadest sense, including arbitrage operations and money-market instruments (22%).

Within equity, we chose equity ideas whose quality-to-price ratio appears to have the lowest downside potential in the long term. We therefore favour companies with moderate

TA Rainbow Income Fund 12

(For the financial period ended 31 December 2022)

valuations, particularly as regards their balance sheets (net cash, working capital, etc.) and reasonably foreseeable activity. The portfolio remains contrarian, with a predominance of European and Asian small caps whose valuations are far from those of the major indices. At the beginning of 2022, valuation biases had reached record levels in terms of style (with the most expensive stocks having a record premium over the cheapest stocks). The same was true geographically (with the US more expensive than the rest of the world). These two excesses have begun to be corrected in 2022 with the strong performance of select stocks that had been largely overlooked by the market. Their astute managers have taken advantage of this to buy back shares. Similarly, the Asian stocks in the portfolio performed well overall, withstanding the market downturn. On the other hand, the discount on small and mid-caps has tended to widen. Lastly, tech stocks, and particularly e-commerce stocks, suffered from the reopening of the economies. We had little exposure to this segment but still suffered with an e-commerce meal-kit platform. We strengthened this segment in 2022 on stocks that we felt were excessively punished.

At the end of December 2022, the bond portfolio had a yield of 8.9% for a sensitivity of 2.6: a favourable positioning that should provide a reservoir of performance, particularly via the carry trade, for the beginning of 2023 in a still uncertain environment. Indeed, the bond market has established itself over the period at a level of yield and credit margins that are now higher than the average of the last 10 years. These are favourable signals for maintaining a significant weighting in the credit portfolio. The last quarter of 2022 saw the strengthening of quality firms. Conversely, we sold off the convertible bond of a British online retailer as its fundamentals were deteriorating in a difficult economic context in the United Kingdom (UK), with hopes of recovery too uncertain. Over the course of 2022, the performance of the bond portfolio was mainly affected by the sharp fall in the Casino perpetual bond after its first half 2022 results remained disappointing. Negative reports from the company and a downgrade by Standard & Poor's accentuated the decline, despite a significant increase in the asset disposal programme and the judicious purchase by the company of short bonds to reduce its debt. Conversely, the bond portfolio benefited from Banijay's Initial Public Offering (IPO) and successive redemptions within the SME Credit Realisation fund, and from the good performance of the discounted and good quality loans that we bought and/or strengthened in 2022.

(Source: Amiral Gestion S. A., as at 31 December 2022)

BlueBay IG Euro Aggregate Bond Fund

The fund invests predominantly in fixed income securities issued by investment grade companies around the world. Its portfolio is globally diversified to extract return opportunities across regions and it seeks to generate excess returns via superior sector and security selection based upon high quality, proprietary research.

The fund saw contributions from short United States (US) and Japanese duration, long Romanian and Mexican sovereign spreads, long European swap spreads, long subordinated bank debt, long cash bonds versus Credit Default Swap (CDS) index hedges

TA Rainbow Income Fund 12

(For the financial period ended 31 December 2022)

and currencies with short United Kingdom (UK) sterling & long Hungarian forint. Detractors for the fund were the long Norwegian krone and Icelandic krona currencies.

Policy tightening is gaining traction and inflation should continue to moderate. But there is still fear that pressure on wages could continue drive up prices. Although we expect US rates to peak in quarter one, and European rates in quarter two, we aren't expecting a hard landing for either region. Labour markets and corporate balance sheets remain in good shape. We expect bond yields to be range-bound, with the opportunities more tactical than the strategic short that worked well last year. We expect supply to increase at both sovereign and corporate levels. n We have a cautious outlook on the European periphery, with the macroeconomic backdrop becoming more challenging. n We may not be too surprised to see spreads end the year close to where they started. This makes playing for carry an attractive option, particularly with volatility starting to moderate. n We believe there are still individual sovereigns in emerging markets that offer attractive value, such as Romania.

S&P 500 Daily Risk Control 5% Excess Return (USD) Index

The S&P 500 Risk Control™ series relies on S&P 500® methodology and overlays mathematical algorithms to maintain specific volatility targets. Index exposure is dynamically rebalanced daily based on observed S&P 500 historic volatility to maintain 5%, 10%, 12%, 15%, and 18% volatility targets.

(Source: S&P Dow Jones Indices, as at 31 December 2022)

Market Outlook And Investment Strategy

For the fixed income portion of the Fund, we expect Bank Negara Malaysia (BNM) to continue increasing the Overnight Policy Rate (OPR) at consistent 25-basis points (bps) increments towards the 3.00%-3.25% range, which has been priced in with current Malaysian Government Securities / Government Investment Issues (MGS/GII) yields. Following the rally in late 2022, we opine that current Ringgit bond yields provide fair value for long-term investors, and caution that the risk of headline and US Treasuries (UST)-driven market volatility remains high in the first quarter of 2023.

With the tension between rising odds of a global recession and still-elevated inflation, the evolution of monetary policies will continue to be the major market driver in 2023. Other factors that may drive up market volatility include potential systemic market events as well as developments in China (COVID-19 re-opening) and Europe (Russia-Ukraine war).

We expect credit spreads to narrow, and onshore appetite for corporate bonds supply to remain strong in the first quarter of 2023. We recommend gradually extend duration through primary issuances participation and/or entry at times of market weakness. We

TA Rainbow Income Fund 12

(For the financial period ended 31 December 2022)

prefer credits with strong balance sheets, proven execution capability, and financial discipline amidst weakening macroeconomic prospect.

Soft Commission

The Manager retains soft commissions received from brokers only if the goods and services are of demonstrable benefits to the unitholders as allowed under the Securities Commission's Guidelines on Unit Trust Funds. The soft commission received include research and advisory services which are used to support the investment decision making process and are of demonstrable benefit to Unitholders of the Fund and there was no churning of trades.

State Of Affairs Of The Fund

There has been neither significant changes to the state of affair of the Fund nor any circumstances that materially affect any interests of the unitholders during the financial period under review.

(For the financial period ended 31 December 2022)

NOTES TO THE UNAUDITED FINANCIAL STATEMENTS FOR THE FINANCIAL PERIOD ENDED 31 DECEMBER 2022

1. THE FUND, THE MANAGER AND THEIR PRINCIPAL ACTIVITIES

TA Rainbow Income Fund 12 ("the Fund") was constituted pursuant to the execution of a Deed of Trust ("the Deed") dated 31 March 2022 between the Manager, TA Investment Management Berhad and the Trustee, CIMB Commerce Trustee Berhad.

The principal activity of the Fund is to invest in "Permitted Investments" as defined under Clause 7 of the deed, which include derivative product, bonds, Negotiable Instrument and money market instruments. The Fund commenced its operations on 27 April 2022 and will continue its operations until terminated by the Trustee as provided under Clause 12 of the deed. The Fund is a close-ended fund maturing on the third (3rd) anniversary of the Commencement Date.

The Manager, TA Investment Management Berhad, a company incorporated in Malaysia, is a wholly-owned subsidiary of TA Securities Holdings Berhad. Its ultimate holding company is TA Enterprise Berhad. The Manager's principal activities are the establishment and management of unit trust funds and fund management. The Manager is licensed to carry out dealing in securities and fund management activities under the Capital Markets and Services Act 2007

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

2.1 Basis of Preparation

(a) Statement of Compliance

The financial statements of the Fund have been prepared in accordance with Malaysian Financial Reporting Standards ("MFRS") and International Financial Reporting Standards ("IFRS"), collectively known as the "Standards".

The following are accounting standards, amendments and interpretations of the MFRS framework that have been issued by the Malaysian Accounting Standards Board ("MASB") but have not been adopted by the Fund:

MFRSs, interpretations and amendments effective for annual periods beginning on or after 1 January 2022

- Amendments to MFRS 1, *First-time Adoption of Malaysian Financial Reporting Standards (Annual Improvements to MFRS Standards 2018–2020)*

TA Rainbow Income Fund 12

(For the financial period ended 31 December 2022)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTD.)

2.1 Basis of Preparation (contd.)

(a) Statement of Compliance (contd.)

MFRSs, interpretations and amendments effective for annual periods beginning on or after 1 January 2022 (contd.)

- Amendments to MFRS 3, *Business Combinations – Reference to the Conceptual Framework*
- Amendments to MFRS 9, *Financial Instruments (Annual Improvements to MFRS Standards 2018–2020)*
- Amendments to Illustrative Examples accompanying MFRS 16, *Leases (Annual Improvements to MFRS Standards 2018–2020)*
- Amendments to MFRS 116, *Property, Plant and Equipment – Proceeds before Intended Use*
- Amendments to MFRS 137, *Provisions, Contingent Liabilities and Contingent Assets – Onerous Contracts – Cost of Fulfilling a Contract*
- Amendments to MFRS 141, *Agriculture (Annual Improvements to MFRS Standards 2018–2020)*

MFRSs, interpretations and amendments effective for annual periods beginning on or after 1 January 2023

- MFRS 17, *Insurance Contracts*
- Amendments to MFRS17, *Insurance Contracts – Initial application of MFRS 17 and MFRS 9 – Comparative Information*
- Amendments to MFRS 101, *Presentation of Financial Statements – Classification of Liabilities as Current or Non-current and Disclosures of Accounting Policies*
- Amendments to MFRS 108, *Accounting Policies, Changes in Accounting Estimates and Errors – Definition of Accounting Estimates*
- Amendments to MFRS 112, *Income Taxes – Deferred Tax related to Assets and Liabilities arising from a Single Transaction*

MFRSs, interpretations and amendments effective for annual periods beginning on or after a date yet to be confirmed

- Amendments to MFRS 10, *Consolidated Financial Statements* and MFRS 128, *Investments in Associates and Joint Ventures – Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*

The Fund plans to adopt the abovementioned accounting standards, interpretations and amendments:

- from the annual period beginning on 1 July 2022 for those amendments that are effective for annual periods beginning on or after 1 January 2022, except for amendments to MFRS 1, MFRS 3, MFRS 16, MFRS 116, MFRS 137 and MFRS 141 which are not applicable to the Fund.

TA Rainbow Income Fund 12

(For the financial period ended 31 December 2022)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTD.)

2.1 Basis of Preparation (contd.)

(a) Statement of Compliance (contd.)

The Fund plans to adopt the abovementioned accounting standards, interpretations and amendments: (contd.)

- from the annual period beginning on 1 July 2023 for those amendments that are effective for annual periods beginning on or after 1 January 2023, except for MFRS 17 and amendments to MFRS 17 which are not applicable to the Fund.

The initial application of the abovementioned accounting standards, interpretations or amendments is not expected to have any material impact to the financial statements of the Fund.

(b) Basis of measurement

The financial statements of the Fund have been prepared on a historical basis unless otherwise indicated in Note 2.2.

(c) Functional and presentation currency

The financial statements are presented in Ringgit Malaysia ("RM"), which is the Fund's functional currency.

2.2 Significant Accounting Policies

The accounting policies set out below have been applied consistently to the periods presented in these financial statements, unless otherwise stated.

(a) Financial Instruments

(i) Recognition and initial measurement

A financial asset (unless it is a trade receivable without significant financing component) or a financial liability is recognised in the statement of financial position when, and only when, the Fund becomes a party to the contractual provisions of the instrument.

A financial asset (unless it is a trade receivable without significant financing component) or a financial liability is initially measured at fair value plus or minus, for an item not at fair value through profit or loss, transaction costs that are directly attributable to its acquisition or issuance. A trade receivable without a significant financing component is initially measured at the transaction price.

TA Rainbow Income Fund 12

(ii) Financial instrument categories and subsequent measurement

Financial assets

The Fund determines the classification of its financial assets at initial recognition, and the categories include financial assets at FVTPL and amortised cost.

(a) Amortised cost

Amortised cost category comprises financial assets that are held within a business model whose objective is to hold assets to collect contractual cash flows and its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. The financial assets are not designated as fair value through profit or loss. Subsequent to initial recognition, these financial assets are measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.

Interest income is recognised by applying effective interest rate to the gross carrying amount except for credit impaired financial assets (see Note 2.2(b)) where the effective interest rate is applied to the amortised cost.

(b) Fair value through profit or loss

All financial assets not measured at amortised cost or fair value through other comprehensive income are measured at fair value through profit or loss. This includes derivative financial assets (except for a derivative that is a designated and effective hedging instrument).

On initial recognition, the Fund may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at fair value through other comprehensive income as at fair value through profit or loss if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial assets categorised as fair value through profit or loss are subsequently measured at their fair value. Net gains or losses, including any interest or dividend income, are recognised in the profit or loss.

TA Rainbow Income Fund 12

(For the financial period ended 31 December 2022)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTD.)

2.2 Significant Accounting Policies (contd.)

(a) Financial Instruments (contd.)

(ii) Financial instrument categories and subsequent measurement (contd.)

Financial assets (contd.)

(b) Fair value through profit or loss (contd.)

All financial assets, except for those measured at fair value through profit or loss are subject to impairment assessment (see Note 2.2(b)).

Financial Liabilities

Amortised cost

Financial liabilities not categorised as fair value through profit or loss are subsequently measured at amortised cost using the effective interest method.

Interest expense and foreign exchange gains and losses are recognised in the profit or loss. Any gains or losses on derecognition are also recognised in the profit or loss.

(iii) Derecognition

A financial asset is derecognised when the asset is disposed and the contractual right to receive cash flows from the asset has expired. On derecognition of a financial asset, the difference between the carrying amount and the sum of the consideration received is recognised in profit or loss.

A financial liability or part of it is derecognised when, and only when, the obligation specified in the contract is discharged, cancelled or expires. A financial liability is also derecognised when its terms are modified and the cash flows of the modified liability are substantially different, in which case, a new financial liability based on modified terms is recognised at fair value. On derecognition of a financial liability, the difference between the carrying amount of the financial liability extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss.

(iv) Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the financial statement when there is a legally enforceable right to set off the recognised amounts and there is an intention either to settle them on a net basis or to realise the asset and liability simultaneously.

TA Rainbow Income Fund 12

(For the financial period ended 31 December 2022)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTD.)

2.2 Significant Accounting Policies (contd.)

(b) Impairment

Financial assets

The Fund recognises loss allowances for expected credit losses on financial assets measured at amortised cost.

The Fund measures loss allowances at an amount equal to lifetime expected credit loss, except for debt securities, if any, that are determined to have low credit risk at the reporting date, cash and bank balance and other debt securities for which credit risk has not increased significantly since initial recognition, which are measured at 12-month expected credit loss.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating expected credit loss, the Fund considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Fund's historical experience and informed credit assessment and including forward-looking information, where available.

Lifetime expected credit losses are the expected credit losses that result from all possible default events over the expected life of the asset, while 12-month expected credit losses are the portion of expected credit losses that result from default events that are possible within the 12 months after the reporting date. The maximum period considered when estimating expected credit losses is the maximum contractual period over which the Fund is exposed to credit risk.

An impairment loss in respect of financial assets measured at amortised cost is recognised in profit or loss and the carrying amount of the asset is reduced through the use of an allowance account.

The gross carrying amount of a financial asset is written off (either partially or fully) to the extent that there is no realistic prospect of recovery. This is generally the case when the Fund determines that the obligor does not have assets or sources of income that could generate sufficient cash flows to pay the amounts subject to the write-off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Fund's procedures for recovery of amounts due.

TA Rainbow Income Fund 12

(For the financial period ended 31 December 2022)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTD.)

2.2 Significant Accounting Policies (contd.)

(c) Classification of Realised and Unrealised Gains and Losses

Unrealised gains and losses comprise changes in the fair value of financial instruments for the year and from reversal of prior year's unrealised gains and losses for financial instruments which were realised (i.e. sold, redeemed or matured) during the financial period.

The realised gain/(loss) on sale investments is measured as the difference between the net disposal proceeds and the carrying amount of the investments. The carrying amount for determining the realised gain/(loss) on sale of investments is based on the weighted average cost method.

(d) Foreign Currency Transactions

Transactions in foreign currencies are translated to the functional currency of the Fund at exchange rates at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies at the end of the reporting period are retranslated to the functional currency at the exchange rate at that date.

Non-monetary assets and liabilities denominated in foreign currencies are not retranslated at the end of the reporting date except for those that are measured at fair value are retranslated to the functional currency at the exchange rate at the date that the fair value was determined.

Foreign currency differences arising on retranslation are recognised in profit or loss, except for differences arising on the retranslation of equity instrument where they are measured at fair value through other comprehensive income or a financial instrument designated as a hedge of currency risk, which are recognised in other comprehensive income.

(e) Unitholders' Capital

The unitholders' capital of the Fund is classified as an equity instrument.

Distribution equalisation represents the average distributable amount included in the creation and cancellation prices of units. This amount is either refunded to unitholders by way of distribution and/or adjusted accordingly when units are cancelled.

(f) Distribution

Distribution is at the discretion of the Fund. A distribution to the Fund's unitholders is made from realised gains or realised income as at the point of time of distribution declaration, except where distribution is sourced out of distribution equalisation which is accounted for as a deduction from unitholders' capital. A proposed distribution is recognised as a liability in the period in which it is approved.

TA Rainbow Income Fund 12

(For the financial period ended 31 December 2022)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTD.)

2.2 Significant Accounting Policies (contd.)

(g) Cash and Cash Equivalents

Cash and cash equivalents comprise cash at banks and short-term deposits with financial institutions that are readily convertible to known amount of cash which have an insignificant risk of changes in fair value with original maturities of more than three months or less, and are used by the Fund in the management of its short-term commitments.

(h) Income Recognition

Income is recognised to the extent that it is probable that the economic benefits will flow to the Fund and the income can be reliably measured. Income is measured at the fair value of consideration received or receivable.

Interest income is recognised using the effective interest rate method.

(i) Income Tax

Current tax assets or liabilities position as at reporting date are measured at the net amount expected to be recovered from or paid to the tax authorities. The tax rates and tax laws used to compute the tax expense for the financial period are those that are enacted or substantively enacted by the reporting date.

Current taxes are recognised in profit or loss except to the extent that the tax relates to items recognised outside profit or loss, either in other comprehensive income or directly in equity.

Deferred tax is provided for, using the liability method, on taxable temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts in the financial statements. In principle, deferred tax liabilities are recognised for all taxable temporary differences and deferred tax assets are recognised for all deductible temporary differences to the extent that it is probable that future taxable profits will be available against which the unutilised tax incentives can be utilised.

(j) Segment Reporting

For management purposes, the Fund is managed under two main portfolios, namely "unquoted structured products and unquoted bonds" and "unquoted Zero-coupon Negotiable Instruments of Deposits ("ZNIDs") and money market instruments". Each segment engages in separate investing activities and the operating results are regularly reviewed by the Investment Manager and Investment Committee. The Investment Committee assumes the role of chief operating decision maker, for performance assessment purposes and to make decisions about resources allocated to each investment segment.

TA Rainbow Income Fund 12

(For the financial period ended 31 December 2022)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTD.)

2.2 Significant Accounting Policies (contd.)

(k) Significant Accounting Estimates and Judgments

The preparation of the Fund's financial statements requires the Manager to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities at the reporting date. However, uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amount of the asset or liability in the future.

No major judgments have been made by the Manager in applying the Fund's accounting policies. There are no key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities.

3. MANAGER'S FEE

No manager's fee is imposed on this Fund.

4. TRUSTEE'S FEE

Trustee's fee is computed on a daily basis at 0.04% per annum of the NAV of the Fund, subject to minimum of RM6,000 per annum calculated and accrued daily (excluding foreign custodian fees and charges).

5. REDEMPTION CHARGE (EXIT FEE)

A charge of 3% of the NAV of the Fund for early redemption by unitholders before the Fund's maturity date.

6. INCOME TAX EXPENSE

Domestic income tax is calculated at the Malaysian statutory tax rate of 24% of the estimated assessable profit for the financial period. Interest and other income derived from sources outside Malaysia are exempted from Malaysian income tax. However, such income may be subject to tax in the country from which they were derived.

In accordance with Schedule 6 of the Income Tax Act 1967, interest income earned by the Fund is exempted from Malaysian tax.

TA Rainbow Income Fund 12

(For the financial period ended 31 December 2022)

6. INCOME TAX EXPENSE (CONTD.)

A reconciliation of income tax expense applicable to net loss before tax at the statutory income tax rate to income tax expense at the effective income tax rate of the Fund is as follows:

	27.04.2022 to 31.12.2022 RM
Net loss before tax	<u>(2,237,193)</u>
Taxation at Malaysian statutory rate of 24%	(536,926)

10. TOTAL EXPENSE AND PORTFOLIO TURNOVER RATIOS

(a) Total Expense Ratio

The total expense ratio for the financial period ended 31 December 2022 is 0.04%. This ratio represents total expenses expressed as an annualised percentage of the Fund's average NAV, calculated on a daily basis. Brokerage and other transaction fees on financial assets at FVTPL are trading related and are not classified as expenses.

(b) Portfolio Turnover Ratio

The portfolio turnover ratio for the financial period ended 31 December 2022 is 0.61. This ratio represents the average of the total acquisitions and disposals of the Fund for the financial period over the average NAV of the Fund for the financial period calculated on a daily basis.

11. TRANSACTIONS WITH INVESTMENT BANKS/BROKERS

Details of transactions with the investment banks/brokers during the financial period are as follows:

Name of investment banks/brokers	Value of trade RM	Percentage to total value of trade %
Hong Leong Bank Bhd	49,233,220	59.03
RHB Bank Bhd	15,148,648	18.16
CIMB Bank Bhd	13,284,963	15.93
BNP Paribas	5,730,698	6.87
	<u>83,397,529</u>	<u>100.00</u>

12. SEGMENT INFORMATION

The Manager and the Investment Committee of the Fund are responsible for allocating resources available to the Fund in accordance with the overall investment strategies as set out in the Investment Guidelines of the Fund. The Fund is managed by two segments:

- A portfolio of structured products; and
- A portfolio of fixed income instruments, including ZNID.

The investment objective is to provide potential annual returns over the Medium-Term of the underlying collective investment scheme investing in investment instruments. There have been no changes in reportable segments in the current financial period.

TA Rainbow Income Fund 12

(For the financial period ended 31 December 2022)

13. FINANCIAL RISK AND MANAGEMENT OBJECTIVES AND POLICIES

The Fund is exposed to a variety of financial risks, which include economic risk, special and emerging market risk, credit and settlement risk, liquidity risk, currency risk and repatriation risk. The overall objective of financial risk management is to mitigate capital losses, ensure preservation of value and minimise erosion of capital.

Risk management is carried out through strict adherence to the Manager's internal policies and control procedures and also to the powers and restrictions vested by the regulators as contained in the Securities Commission's Guidelines on Unit Trust Funds ("the Guidelines").

(a) Economic Risk

Prospective investors should be aware that the price of units and the income from their investments may go down or up in response to changes in interest rate, foreign exchange, economic and political conditions and the earnings of corporations making up in the portfolio of the Fund. Economic risk is managed through portfolio diversification and asset allocation and monitoring of investment portfolio by professional fund manager and the investment committee, with the aim to minimise securities exposure in the event of anticipated market weaknesses.

(b) Credit/Default Risk

Credit risk is the risk that the counterparty to a financial instrument will cause a financial loss for the Fund by failing to discharge an obligation. The Fund is exposed to the risk of credit-related losses that can occur as a result of a counterparty or issuer being unable or unwilling to honour its contractual obligations to make timely payment of profit, principal and proceeds from realisation of investments. These credit exposures exist within financing relationships, derivatives and other transactions.

The Manager manages the Fund's credit risk by undertaking credit evaluation and close monitoring of any changes to the issuer/counterparty's credit profile to minimise such risk. It is the Fund's policy to enter into financial instruments with reputable counterparties. The Manager also closely monitors the creditworthiness of the Fund's counterparties (e.g. issuer, custodian, bank, etc) by reviewing their credit ratings and credit profile on a regular basis.

(c) Interest Rate Risk

The risk refers to the exposure of the Fund's assets to movements in interest rates. In this regards, the Fund's exposure to the interest rate risk is mainly confined to the fixed income securities prices and deposits placement with financial institutions.

The reason for this is because a high level of interest rates will inevitably effect corporate profits and this will have an impact on the value of equity and the demand for fixed income securities.

TA Rainbow Income Fund 12

(For the financial period ended 31 December 2022)

13. FINANCIAL RISK AND MANAGEMENT OBJECTIVES AND POLICIES (CONTD.)

(d) Structured Products Risks

The value of the structured products or options is affected by a number of market factors. Hence, before redeeming or closing out on an investment in the Fund, unitholders should carefully consider the factors such as the value, expected price volatility of the underlying asset or index, the time remaining to maturity, the level of prevailing interest rate, the depth of the market or liquidity of any underlying asset over the underlying index, and change in currency exchange rates and related transaction costs.

It is not possible to predict it and to what extent a secondary market may develop in any over-the-counter (off-exchange) structured products or at what price such structured products will trade in the secondary market or whether such market will be liquid or illiquid. Although the structured product seller has undertaken to trade the structured products in the secondary market, there is no assurance that secondary market prices will reflect fair market value or what unitholders deem to be fair value. Dealing in over-the-counter instruments may involve greater risks than dealing in exchange-traded instruments. The price at which the structured products will trade will be dependent on market conditions, which are beyond the Manager's control.

Market volatility reflects the degree of instability and expected instability of the performance of the underlying asset or index. The level of market volatility is not purely a measurement of the actual volatility, but is largely determined by the prices for instruments which offer investors protection against such market volatility. The prices of these instruments are determined by forces of supply and demand in the structured products markets generally. These forces are, themselves, affected by factors such as actual market volatility, expected volatility, macro economic factors and speculation.

14. COMPARATIVE FIGURES

The current period's figures and comparative figures are presented as follow:

- The Statement of Fund Financial Position and its relevant notes are as at 31 December 2022, respectively.

15. UNAUDITED ACCOUNT
