We will endeavor to declare a fixed distribution. Further, we have the absolute discretion but not the obligation to declare a higher distribution (i.e. above the sen per Unit of distribution) if the Fund performs well which may not be repeated for the subsequent months.					
The effects of distributing income out of capital would include but are not limited to the following:					
<ul style="list-style-type: none">the value of the investments in the Fund may be reduced;the capital of the Fund may be eroded.					
The distribution is achieved by forgoing the potential for future capital growth. As a result, the value of future returns would be diminished and there would be an impact on the future growth potential of the Fund as the available assets to grow in the future are the net of the expenses charged to the Fund. Please note that if distribution is made, such distribution is not a forecast, indication or projection of the future performance of the Fund.					
For the avoidance of doubt, any distribution will be rounded to two (2) decimal points (sen per Unit) based on the policy on rounding adjusting of the NAV per Unit of the Class.					
Note: The Manager has the right to make provisions for reserves in respect of distribution of the Fund and has the discretion to decide on the amount to be distributed to the Unit Holders.

4. Who am I investing with?

Manager	TA Investment Management Berhad (Registration Number:199501011387 (340588-T))
Trustee	CIMB Commerce Trustee Berhad (Registration Number: 199401027349 (313031-A))

5. What are the possible outcomes of my investment?

This is a wholesale feeder fund where the Target Fund uses a balanced approach to invest in a broad range of securities primarily domiciled in the United States, including common stocks and Investment Grade Bonds. The performance of the Fund would be dependent on the investments of the Target Fund and reliant on the Investment Adviser's expertise in managing the Target Fund to meet its investment objective.

The investors may gain from the appreciation of Unit price as a result of the increase in value of the underlying and/or accrual of interest earned. However, investment involves risk. The value of the Fund may rise or fall. Distribution (if any) may be declared out of the income and/or capital of the Fund. These risk factors, among others, may cause you to lose part or all of your investment.

KEY RISKS

6. What are the key risks associated with this product?

General risks of investing in the Fund
Market Risk Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the Fund's NAV.
Manager Risk This risk refers to the day-to-day management of the Fund by the Manager which will impact the performance of the Fund. For example, investment decisions undertaken by the Manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant laws or Guidelines due to factors such as human error or weaknesses in operational processes and systems may adversely affect the performance of the Fund.
Inflation Risk Inflation risk is the risk that investor's investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce investor's purchasing power even though the value of the investment in monetary terms has increased.
Non-compliance Risk This risk arises from non-compliance with laws, rules, regulations, prescribed practices and internal policies and procedures by the Manager. For example, the Manager may fail to comply with internal policies and procedures due to internal factors such as oversight, human error and/or system error. This risk may also occur indirectly due to the imposition and/or amendment to the relevant regulatory frameworks, laws, rules and other prescribed practices affecting the Fund. The Manager has put in place internal controls to ensure that comprehensive and timely compliance monitoring is undertaken.
Loan Financing Risk This risk occurs when investors take a loan or financing to finance their investment. The inherent risk of investing with borrowed or financed money includes investors being unable to service the loan or financing repayments. In the event Units are used as collateral, investors may be required to top-up the investors' existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower NAV per Unit as compared to the NAV per Unit at the point of purchase towards settling the loan or financing.
Operational Risk Apart from a market disruption event, system interruption can also impact processes when there is an interruption in the flow of information needed for making qualified decisions where decisions are made based on accurate flow of information with operated system in managing the Fund. These disruptions may impact the performance of the Fund, the settlement of trades in the Fund and may also affect the investor's transactions with the Fund. The Manager has put in place internal controls to manage some of these disruptions such as business continuity plans. However, investors should note that not all circumstances can be prepared for nor anticipated. In such circumstances, the Manager, in consultation with the Trustee, will take appropriate measures to safeguard the Unit Holders' interests.
Suspension Risk The Manager may, in consultation with the Trustee and having considered the interests of the Unit Holders, suspend the redemption of Units where it is impractical for the Manager to calculate the NAV of the Fund due to the Manager being

unable to determine the market value or fair value of a material portion of the Fund's investments. Upon suspension, the Fund will not be able to pay Unit Holders' redemption proceeds in a timely manner and Unit Holders will be required to remain invested in the Fund for a longer period. In such a scenario, Unit Holder's investments will continue to be subjected to risk factors inherent to the Fund.

Specific risks related to the Fund

Concentration Risk

The Fund is exposed to concentration risk as it is investing a minimum of 85% of its NAV in the Target Fund. Hence, this would result in the Fund being exposed to the risk of its NAV declining when the Target Fund's NAV declines. All investment decisions on the Target Fund are left with the Investment Adviser and the Fund's performance is fully dependent on the performance of the Target Fund.

Currency Risk

The Fund may offer Units in multiple currency Classes, which will expose the Unit Holder to currency risk in respect to the currency of Units of a Class other than the Base Currency.

(i) Currency risk at the hedged Class level

Investors in the hedged Classes are subject to currency risk due to imperfect hedging by the Manager when the Manager hedges the respective currency of the hedged Classes against the Base Currency. However, investors should note that hedging is subject to a minimum investment size of entering into a forward contract and the unhedged portion of the respective hedged Classes may still be affected by the exchange rate movement which may result in fluctuation of NAV of the respective hedged Classes. In addition, investors in the hedged Classes should note that by employing this hedging, investors would not be able to enjoy the additional currency gains when the Base Currency moves favourably against the currency of the hedged Classes. Additional transaction costs of hedging will also have to be borne by the investors in these hedged Classes.

Investors in the hedged Classes should also note that in the event if the fund size of the hedged Classes is relatively small, the Manager may not hedge the respective currency of the hedged Classes against the Base Currency if it is of the view that the hedging is not in the interests of the Fund and/or Unit Holders.

(ii) Currency risk at the non-hedged Class level

For investors in the non-hedged Classes, the impact of the exchange rate movement between the Base Currency and the currency of the respective non-hedged Classes (other than USD Class) may result in a depreciation of the investor's holdings as expressed in the Base Currency.

Counterparty Risk

Investors in the hedged Classes of the Fund are subject to counterparty risk on the derivatives contract that may be entered into with the financial institutions for the purpose of hedging strategy. Hence, any default or downgrade in rating by the counterparty may affect the NAV of the Fund. In mitigating this risk, the Manager will carry out stringent selection process on the counterparty prior to entering into derivatives contract with the counterparty.

Country Risk

The Fund invests in the Target Fund which is domiciled in Luxembourg. Any adverse changes in the economic fundamentals, social and political stability, currency movements and foreign investments policies in Luxembourg may have an impact on the prices of the Target Fund and consequently may also affect the Fund's NAV.

Temporary Suspension of the Collective Investment Scheme Risk

The Management Company has the right to suspend calculation of NAV or transaction of the Target Fund. Please refer to Section 3.11 Suspensions of Determination of NAV and of Issue, Switch and Redemption of Shares of the Target Fund of the Information Memorandum for more details.

If the right of the Fund to redeem its shares of the Target Fund is temporarily suspended, the Fund may also be affected if the Fund does not have sufficient liquidity to meet redemption requests from the Unit Holders.

To avoid suspension of the Fund, the Fund will hold adequate Liquid Assets (up to 15% of the Fund's NAV) and if the Liquid Assets are insufficient to meet redemption requests, the Manager may seek temporary financing if this is in the best interests of Unit Holders. If the Manager has exhausted all possible avenues to avoid a suspension of the Fund, the Manager may as a last resort, in consultation with the Trustee and having considered the interests of the Unit Holders, suspend the redemption of Units where it is impractical for the Manager to calculate the NAV of the Fund due to market value or fair value of the investment in the Target Fund cannot be determined.

Please note that during the suspension period, there will be no NAV per Unit available and hence, any application for subscription, redemption or switching of Units received by the Manager during the suspension period will only be accepted and processed on the next Business Day after the cessation of the suspension. Unit Holders will be notified of the suspension and when the suspension is lifted.

Fund Management of the Target Fund Risk

The Manager has exercised due skill and care in selecting the Target Fund. However, the Manager does not have control over the management of the Target Fund and there is no guarantee that the investment objective of the Target Fund will be met. This may affect the value of the Unit Holders' investments in the Fund.

The Target Fund may change its investment objective which may become inconsistent with the investment objective of the Fund. In such instances, the Manager will replace the Target Fund with another collective investment scheme which it considers to be more appropriate in meeting the investment objective of the Fund. Any changes on the replacement of the Target Fund would require the Unit Holders' approval.

Distribution Out of Capital Risk

Distribution may be paid out of capital when the realised gains or realised income of the Fund is insufficient to pay a distribution. Unit Holders should note that the payment of distribution out of capital represents a return or withdrawal of part of the amount from any capital gains attributable to the original investment. Such distribution may result in an immediate decrease in the NAV per Unit of the Class and in the capital of the Fund which is available for investment in the future. As a result, capital growth may be reduced and a high distribution yield from distribution out of capital does not imply a positive or high return on Unit Holders' total investments.

Note:

Please refer to section "Risk Factors" of the Information Memorandum, including specific risks related to the Target Fund for further information.

It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. The various assets classes generally exhibit different levels of risk.

You are recommended to read the whole Information Memorandum to assess the risks associated to the Fund. If necessary, you should consult your adviser(s) for a better understanding of the risks.

Please be advised that if a Sophisticated Investor invests in Units through an IUTA which adopts the nominee system of ownership, the Sophisticated Investor would not be considered to be a Unit Holder under the Deed as the Sophisticated Investor's name will not appear in the register of Unit Holders. The Sophisticated Investor may consequently not have all the rights ordinarily exercisable by a Unit Holder (for example, the right to call for a Unit Holders' meeting and to vote thereat).
