4. Who am I investing with?

Manager	TA Investment Management Berhad (Registration Number: 199501011387 (340588-T))
Trustee	CIMB Commerce Trustee Berhad (Registration Number: 199401027349 (313031-A))

5. What are the possible outcomes of my investment?

This is a wholesale feeder fund where the Target Fund invests into a diversified portfolio of equities or equity-related instruments issued by Chinese Companies. The performance of the Fund would be dependent on the investments of the Target Fund and reliant on the Investment Manager's expertise in managing the Target Fund to meet its investment objective.

The investors may gain from the appreciation of Unit price as a result of the increase in value of the underlying and/or accrual of interest earned. However, investment involves risk. The value of the Fund may rise or fall. Subject to availability of income, distribution is incidental. Distribution of income will only be made from realised gains or realised income. These risk factors, among others, may cause you to lose part or all of your investment.

KEY RISKS

6. What are the key risks associated with this product?

General risks of investing in the Fund	
Market Risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets due to economic, political and/or other factors which will result in a decline in the Fund's NAV.
Inflation Risk	Inflation risk is the risk that investor's investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce investor's purchasing power even though the value of the investment in monetary terms has increased.

Non-compliance Risk

This risk arises from non-compliance with laws, rules, regulations, prescribed practices and internal policies and procedures by the management company. For example, we may fail to comply with internal policies and procedures due to internal factors such as oversight, human error and/ or system error. This risk may also occur indirectly due to the imposition and/or amendment to the relevant regulatory frameworks, laws, rules and other prescribed practices affecting the Fund. We have put in place internal controls to ensure that comprehensive and timely compliance monitoring is undertaken.

Operational Risk

Apart from a market disruption event, system interruption can also impact processes when there is an interruption in the flow of information needed for making qualified decisions where decisions are made based on accurate flow of information with operated system in managing the Fund. These disruptions may impact the performance of the Fund, the settlement of trades in the Fund and may also affect the investor's transactions with the unit trust fund. We have put in place internal controls to manage some of these disruptions such as business continuity plans. However, investors should note that not all circumstances can be prepared for nor anticipated. In such circumstances, we in consultation with the Trustee will take appropriate measures to safeguard the Unit Holders' interests.

Manager Risk

This risk refers to the day-to-day management of the Fund by the Manager which will impact the performance of the Fund. For example, investment decisions undertaken by the Manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant laws or guidelines due to factors such as human error or weaknesses in operational processes and systems may adversely affect the performance of the Fund.

Loan Financing Risk

This risk occurs when investors take a loan or financing to finance their investment. The inherent risk of investing with borrowed or financed money includes investors being unable to service the loan or financing repayments. In the event Units are used as collateral, investors may be required to top-up the investors' existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower NAV per Unit as compared to the NAV per Unit at the point of purchase towards settling the loan or financing.

Suspension Risk

The Manager may, having considered the interests of the Unit Holders, request the Trustee to suspend the redemption of Units where it is impractical for the Manager to calculate the NAV of the Fund due to the Manager being unable to determine the market value or fair value of a material portion of the Fund's investments. The Trustee may suspend the redemption of Units if the Trustee considers that it is not in the interests of the Unit Holders to permit the Fund's assets to be sold or that the assets cannot be liquidated at an appropriate price or on adequate terms. Upon suspension, the Fund will not be able to pay Unit Holders' redemption proceeds in a timely manner and Unit Holders will be required to remain invested in the Fund for a longer period. In such a scenario, Unit Holder's investments will continue to be subjected to risk factors inherent to the Fund.

Specific risks related to the Fund**Risk of Passive Strategy**

The Fund adopts a passive strategy of investing a minimum of 85% of its NAV into the Target Fund at all times. This passive strategy would result in the Fund being exposed to the risk of its NAV declining when the Target Fund's NAV declines. All investment decisions on the Target Fund are left with the Investment Manager and the Fund's performance is fully dependent on the performance of the Target Fund.

Currency Risk

The Fund may offer Units in multiple currency Classes, which will expose the Unit Holder to currency risk in respect to the currency of Units of a Class other than the base currency of the Fund.

(i) Currency risk at the hedged Class level

Investors in the hedged Classes are subject to currency risk as the Manager will as much as practicable mitigate this risk by hedging the respective currency against the base currency of the Fund. However, investors should note that hedging is subject to a minimum investment size of entering into a forward contract and the unhedged portion of the respective hedged Classes may still be affected by the exchange rate movement which may result in fluctuation of NAV of the respective hedged Classes. In addition, investors in the hedged Classes should note that by employing this hedging, investors would not be able to enjoy the additional currency gains when USD moves favourably against the currency of the hedged Classes. Additional transaction costs of hedging will also have to be borne by investors in these hedged Classes.

(ii) Currency risk at the non-hedged Class level

For investors in the non-hedged Classes, the impact of the exchange rate movement between the base currency of the Fund and the currency of the respective Classes (other than USD Class) may result in a depreciation of the investor's holdings as expressed in the base currency of the Fund.

Country Risk

The Fund invests in the Target Fund which is domiciled in Luxembourg. Any adverse changes in the Luxembourg's economic fundamentals, social and political stability, currency movements and foreign investments policies in Luxembourg may have an impact on the prices of the Target Fund and consequently may also affect the Fund's NAV.

Fund Management of the Target Fund Risk

We have exercised due skill and care in selecting the Target Fund; however, we do not have control over the management of the Target Fund and there is no guarantee that the investment objective of the Target Fund will be met. This may affect the value of the Unit Holders' investments in the Fund.

The Target Fund may change its objective and become inconsistent with the objective of the Fund. In such instances, we will replace the Target Fund with other collective investment scheme which we consider to be more appropriate in meeting the objective of the Fund. Any changes on the replacement of the Target Fund would require the Unit Holders' approval.

Counterparty Risk

Investors in the hedged Classes of the Fund are subject to counterparty risk on the derivatives contract that may be entered into with the financial institutions for the purpose of hedging strategy. Hence, any default or downgrade in rating by the counterparty may affect the NAV of the Fund. In mitigating this risk, the Manager will carry out stringent selection process on the counterparty prior to entering into derivatives contract with the counterparty.

Temporary Suspension of Collective Investment Scheme Risk

If the right of the Fund to redeem its shares of the Target Fund is temporarily suspended, the Fund may also be affected if the Fund does not have sufficient liquidity to meet redemption request from Unit Holder. During the suspension period, there will be no NAV per Unit available and hence, any application for subscription, redemption or switching of Units received by the Manager during the suspension period will only be accepted and processed on the next Business Day after the cessation of the suspension. Unit Holders will be notified of the suspension and when the suspension is lifted.

Note:

Please refer to section "Risk Factors" of the Information Memorandum, including specific risks related to the Target Fund for further information.

It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. The various assets classes generally exhibit different levels of risk.

You are recommended to read the whole Information Memorandum to assess the risks associated to the Fund. If necessary, you should consult your adviser(s) for a better understanding of the risks.

Please be advised that if a Sophisticated Investor invests in Units through an IUTA which adopts the nominee system of ownership, the Sophisticated Investor would not be considered to be a Unit Holder under the Deed as the Sophisticated Investor's name will not appear in the register of Unit Holders. The Sophisticated Investor may consequently not have all the rights ordinarily exercisable by a Unit Holder (for example, the right to call for a Unit Holder's meeting and to vote thereat).
