Past performance is not necessarily indicative of future performance. Unit prices and investment returns may go down, as well as up.

The basis of calculating and assumption made in calculating the returns:

$$\text{Percentage Growth} = \frac{N^1 - N^2}{N^2} \times 100$$

N¹ = NAV on the end of the period

N² = NAV on the beginning of the period

$$* \text{Average Total Return} = \frac{\text{Total Sub Period Returns}}{\text{Number of Sub Periods}}$$

$$** \text{Annual Total Return} = (1 + \text{Cumulative Return})^{N^3/N^4} - 1$$

N³ = Number of periods per year

N⁴ = Total number of periods

Factor in for unit splits and distributions paid out (if any during the period)

Market Review

The earlier part of 2023 saw the Malaysian government announcing easing conditions for hiring foreign workers in five critical industries — manufacturing, construction, plantations, agriculture and food and beverages, potentially easing the foreign workers shortage situation. The FBM KLCI registering a 2.1% slip in February 2023, likely due to concerns over steeper-than-expected rate hikes in the United States (US), as well as selling by both local and foreign investors. Market weaknesses persisted in March 2023, with the FBM KLCI declining 2.2% that month due to concerns over a global banking crisis (the collapse of Silicon Valley Bank and Signature Bank and the takeover of Credit Suisse by UBS Bank). The decline was aggravated by a significant jump in selling of equities by foreign investors in March 2023.

Market sentiment remained poor in April 2023 due to the renewed stress in the banking sector over in the US, with First Republic Bank announcing that it had suffered from outflows of more than \$100 billion US Dollars in the first quarter of 2023, making it the third major bank in the United States to fail within the span of two months. Nevertheless, In May 2023, the FBM KLCI declined 2.0%, mainly due to a gloomy earnings reporting season. The local bourse's downhill movement was also accompanied by the Ringgit's (MYR) pronounced drop against the greenback and Singapore dollar (SGD), by hitting fresh lows against the Singapore Dollar (SGD) to over S\$3.40. Bank Negara Malaysia (BNM) raised the Overnight Policy Rate (OPR) by 25 bps to 3.00% in its May 2023 meeting.

The FBM KLCI slipped 0.8% in June 2023, as market sentiment remained frail as investors looked to the upcoming six state elections in August 2023. Overall, it was an uneventful month since there were few government developments other than a few initiatives announced by the Prime Minister Anwar Ibrahim for capital markets. Among the measures announced was the reduction of stamp duty rate for shares traded on the local bourse, promotion of corporate ventures, and easing the listing of process. The FBM KLCI finally posted a gain of 6.0% in July 2023 after consecutive losses over the prior 6 months as the local bourse rallied amid the Ringgit's (MYR) impressive rebound. The unveiling of high impact investment initiatives by the Prime Minister Dato Seri Anwar to boost the domestic economy through the Madani Economy Framework and the National Energy Transition Roadmap has added some optimism to investor sentiment. The Prime Minister also alluded that there would be more details in the New Industrial Master Plan in August 2023.

Economic Outlook

At its July 2023 Monetary Policy Committee (MPC) meeting, Bank Negara Malaysia (BNM) held the OPR at 3.00%, in line with market expectation. It was also the first MPC meeting chaired by the new BNM Governor, Datuk Abdul Rasheed Ghaffour. In arriving at the policy decision, the MPC took into consideration a more moderate pace of domestic economic expansion in recent months, and the moderation in both headline and core inflation. The policy statement mentioned downside risk from weaker-than-expected global growth; while inflation outlook is subject to various risk factors including persistent core

TA Dana OptiMix

(For the 6 months ended 31 July 2023)

inflation, changes in policy on subsidies and price controls, as well as global commodity prices and financial market development. Upside risks remain for domestic inflation and the OPR, in particular due to the potential removal of government subsidies after state elections.

Market Outlook And Investment Strategy

With cost pressures continuing to ease and a softer tone from central bankers, the investment market perceives this as a sign that the worst is really over for the equity market. The recovery in the market has slowly turned increasingly broad based with the value stocks moving along with the growth stocks. As a result, we have seen the Dow Jones Index gaining 4.6% within 2 months, keeping pace with the Nasdaq gain of 5.1%. We are very optimistic with this trend as it indicates a healthy market recovery and has the momentum to sustain longer. The expectations of an imminent pause or an end to this interest rate hike cycle should provide further impetus to the market.

As such, we think the Asian markets especially the Malaysian market should also be taking cue from the US market. Though we have gone through a bad patch, we believe it is about time for our market to reflect its true value. The FBM KLCI is currently trading way below its historical averages despite attaining decent Gross Domestic Product (GDP) growth and a new progressive unity government driving the country's development. With this, we think a re-rating of the Malaysian equity market is imminent and therefore an overweight call is warranted. Overall, our Malaysian-centric funds are fully invested and positioned for a bullish market.

Soft Commission

The Manager retains soft commissions received from brokers only if the goods and services are of demonstrable benefits to the unitholders as allowed under the Securities Commission's Guidelines on Unit Trust Funds. The soft commission received include research and advisory services which are used to support the investment decision making process and are of demonstrable benefit to Unitholders of the Fund and there was no churning of trades.

State Of Affairs Of The Fund

There has been neither significant changes to the state of affair of the Fund nor any circumstances that materially affect any interests of the unitholders during the financial year under review.

However, we have registered the First Supplementary Master Prospectus dated 25 August 2022 and the Second Supplementary Master Prospectus dated 30 November 2022 with the Securities Commission Malaysia. This First Supplementary Master Prospectus and the Second Supplementary Master Prospectus must be read together with the Master Prospectus dated 23 November 2021. The changes were effective 30 November 2022.

Refer to list of amendments in respect of the First Supplementary Master Prospectus for your reference.

		Note: Please refer to cleansing process for the Funds for details.	
	NA	<ul style="list-style-type: none">• <u>Distribution Out of Capital Risk</u> Distribution may be paid out of capital when the realised gains or realised income of the Fund is insufficient to pay a distribution. Unit Holders should note that the payment of distribution out of capital represents a return or withdrawal of part of the amount from any capital gains attributable to the original investment. Such distribution may result in an immediate decrease in the NAV per Unit of the Fund and the capital of the Fund which is available for investment in the future. As a result, capital growth may be reduced and a high distribution yield from distribution out of capital does not imply a positive or high return on Unit Holders' total investments.

TA Dana OptiMix

(For the 6 months ended 31 July 2023)

NOTES TO THE UNAUDITED FINANCIAL STATEMENTS FOR THE FINANCIAL PERIOD ENDED 31 JULY 2023

1. THE FUND, THE MANAGER AND THEIR PRINCIPAL ACTIVITIES

TA Dana OptiMix ("the Fund") was constituted pursuant to the execution of a Deed of Trust ("the Deed") dated 31 December 2004 and Supplemental Deed (collectively referred to as "the Deeds") between the Manager, TA Investment Management Berhad, the Trustee, CIMB Commerce Trustee Berhad and the registered holders of the Fund.

The principal activity of the Fund is to invest in "Authorised Investments" as defined under Clause 1 of the Deed, which include Shariah-compliant stocks and shares of companies quoted on Bursa Malaysia Securities Berhad ("Bursa Malaysia") and short term Shariah-compliant investments. The Fund commenced operations on 17 January 2005 and will continue its operations until terminated by the Trustee as provided under Clause 23 of the Deed.

The Manager, TA Investment Management Berhad, a company incorporated in Malaysia, is a wholly owned subsidiary of TA Securities Holdings Berhad. Its ultimate holding company is TA Enterprise Berhad. Its principal activities are the establishment and management of unit trust funds and fund management. The Manager is licensed to carry out dealing in securities and fund management activities under the Capital Markets and Services Act 2007.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

2.1 Basis of Preparation

(a) Statement of compliance

The financial statements of the Fund have been prepared in accordance with Malaysian Financial Reporting Standards ("MFRS") and International Financial Reporting Standards ("IFRS"), collectively known as the "Standards".

(b) Basis of measurement

The financial statements of the Fund have been prepared on the historical cost basis, unless otherwise indicated in Note 2.2.

(c) Functional and presentation currency

The financial statements are presented in Ringgit Malaysia ("RM"), which is the Fund's functional currency.

TA Dana OptiMix

(For the 6 months ended 31 July 2023)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTD.)

2.2 Significant Accounting Policies

(a) Financial Assets

Financial assets are recognised in the statement of financial position when, and only when, the Fund becomes a party to the contractual provisions of the financial instrument.

When financial assets are recognised initially, they are measured at fair value, plus, in the case of financial assets not at fair value through profit or loss ("FVTPL"), directly attributable transaction costs.

A financial asset is derecognised when the asset is disposed and the contractual right to receive cash flows from the asset has expired. On derecognition of a financial asset, the difference between the carrying amount and the sum of the consideration received is recognised in profit or loss.

Financial assets and liabilities are offset and the net amount reported in the financial statement when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

The Fund determines the classification of its financial assets at initial recognition, and the categories include financial assets at FVTPL and receivables.

(i) Financial assets at FVTPL

FVTPL category comprises financial assets that are held for trading, including Islamic derivatives (except for an Islamic derivative that is a financial guarantee contract or a designated and effective hedging instrument) or financial assets that are specifically designated into this category upon initial recognition.

Islamic derivatives that are linked to and must be settled by delivery of unquoted Shariah-compliant equity instruments whose fair values cannot be reliably measured are measured at cost.

Other financial assets categorised as FVTPL are subsequently measured at their fair values with the gain or loss recognised in profit or loss.

(For the 6 months ended 31 July 2023)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTD.)

2.2 Significant Accounting Policies (Contd.)

(a) Financial Assets (Contd.)

(ii) Receivables

Financial assets with fixed or determinable payments that are not quoted in an active market are classified as receivables. The Fund includes short-term receivables in this classification.

Subsequent to initial recognition, financial assets categorised as receivables are measured at amortised cost using the effective profit rate method. Gains and losses are recognised in profit or loss when such financial assets are derecognised or impaired, and through the amortisation process.

(b) Impairment of Financial Assets

All financial assets (except for financial assets categorised as fair value through profit or loss) are assessed at each reporting date whether there is any objective evidence of impairment as a result of one or more events having an impact on the estimated future cash flows of the asset. Losses expected as a result of future events, no matter how likely, are not recognised. For an investment in a Shariah-compliant equity instrument, a significant or prolonged decline in the fair value below its cost is an objective evidence of impairment. If any such objective evidence exists, then the impairment loss of the financial asset is estimated.

An impairment loss in respect of receivables is recognised in profit or loss and is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the asset's original effective profit rate. The carrying amount of the asset is reduced through the use of an allowance account.

If, in a subsequent period, the fair value of a debt instrument increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in profit or loss, the impairment loss is reversed, to the extent that the asset's carrying amount does not exceed what the carrying amount would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in profit or loss. For the purpose of the investments made by the Fund, debt instrument refers to sukuk.

(For the 6 months ended 31 July 2023)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTD.)

2.2 Significant Accounting Policies (Cont.)

(c) Classification of Realised and Unrealised Gains and Losses

Unrealised gains and losses comprise changes in the fair value of financial instruments for the period and from reversal of prior period's unrealised gains and losses for financial instruments which were realised (i.e. sold, redeemed or matured) during the financial period.

Realised gains and losses on disposals of financial instruments classified as part of 'at FVTPL' are calculated using weighted average method. They represent the difference between an instrument's initial carrying amount and disposal amount.

(d) Financial Liabilities

Financial liabilities are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability.

Financial liabilities, within the scope of MFRS 139, *Financial Instruments: Recognition and Measurement* are recognised in the statement of financial position when, and only when, the Fund becomes a party to the contractual provisions of the financial instrument.

The Fund's financial liabilities are recognised initially at fair value plus any directly attributable transaction costs and subsequently measured at amortised cost using the effective profit rate method.

A financial liability is derecognised when the obligation under the liability is extinguished. Gains and losses are recognised in profit or loss when the liabilities are derecognised.

TA Dana OptiMix

(For the 6 months ended 31 July 2023)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTD.)

2.2 Significant Accounting Policies (Cont.)

(e) Foreign Currency Transactions

Transactions in foreign currencies are translated to the functional currency of the Fund at exchange rates at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies at the end of the reporting period are retranslated to the functional currency at the exchange rate at that date.

Non-monetary assets and liabilities denominated in foreign currencies are not retranslated at the end of the reporting date except for those that are measured at fair value are retranslated to the functional currency at the exchange rate at the date that the fair value was determined.

Foreign currency differences arising on retranslation are recognised in profit or loss, except for differences arising on the retranslation of available-for-sale equity instruments or a financial instrument designated as a hedge of currency risk, which are recognised in other comprehensive income.

(f) Unitholders' Capital

The unitholders' capital of the Fund is classified as an equity instrument.

Distribution equalisation represents the average distributable amount included in the creation and cancellation prices of units. This amount is either refunded to unitholders by way of distribution and/or adjusted accordingly when units are cancelled.

(g) Distribution

Distribution is at the discretion of the Fund. A distribution to the Fund's unitholders is accounted for as a deduction from realised reserves except where distribution is sourced out of distribution equalisation which is accounted for as a deduction from unitholders' capital. A proposed distribution is recognised as a liability in the period which it is approved.

(h) Cash and Cash Equivalents

Cash and cash equivalents comprise cash at banks and short-term Islamic deposits with financial institutions that are readily convertible to known amount of cash and which are subject to an insignificant risk of changes in value.

TA Dana OptiMix

(For the 6 months ended 31 July 2023)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTD.)

2.2 Significant Accounting Policies (Contd.)

(i) Income Recognition

Income is recognised to the extent that it is probable that the economic benefits will flow to the Fund and the income can be reliably measured. Income is measured at the fair value of consideration received or receivable.

Dividend income is recognised when the Fund's right to receive payment is established.

Profit income is recognised using the effective profit rate method.

(j) Income Tax

Current tax assets or liabilities position as at reporting date are measured at the net amount expected to be recovered from or paid to the tax authorities. The tax rates and tax laws used to compute the tax expense for the financial period are those that are enacted or substantively enacted by the reporting date.

Current taxes are recognised in profit or loss except to the extent that the tax relates to items recognised outside profit or loss, either in other comprehensive income or directly in equity.

Deferred tax is provided for, using the liability method, on taxable temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts in the financial statements. In principle, deferred tax liabilities are recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available against which the temporary differences can be utilised.

(k) Segment Reporting

For management purposes, the Fund is managed by two main portfolios, namely Shariah-compliant equity securities and Islamic money market instruments. Each segment engages in separate investment activities and the operating results are reviewed by the Investment Manager and Investment Committee. The Investment Committee assumes the role of chief operating decision maker, for performance assessment purposes and to make decisions about resources allocated to each Shariah-compliant investment segment.

TA Dana OptiMix

(For the 6 months ended 31 July 2023)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTD.)

2.2 Significant Accounting Policies (Contd.)

(I) Significant Accounting Estimates and Judgments

The preparation of the Fund's financial statements requires the Manager to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities at the reporting date. However, uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amount of the asset or liability in the future.

The Manager classifies its Shariah-compliant equity securities as financial assets at FVTPL as the Fund is an open-ended fund that may sell its Shariah-compliant investments in the short term for profit taking or to meet unitholders' redemptions.

No other major judgments have been made by the Manager in applying the Fund's accounting policies. There are no key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial period.

3. MANAGER'S FEE

Manager's fee is computed on a daily basis at 1.5% (2022: 1.5%) per annum of the NAV of the Fund, as agreed by the Trustee and the Manager.

4. TRUSTEE'S FEE

Trustee's fee is computed on a daily basis at 0.055% (2022: 0.055%) per annum of the NAV of the Fund, subject to minimum of RM15,000 (2022: RM15,000) per annum.

TA Dana OptiMix

(For the 6 months ended 31 July 2023)

5. INCOME TAX EXPENSE

Domestic income tax is calculated at the Malaysian statutory tax rate of 24% (2022: 24%) of the estimated assessable profit for the financial period. Dividend, profit and other income derived from sources outside Malaysia are exempted from Malaysian income tax. However, such income may be subjected to tax in the country from which it is derived.

The taxation charge for the financial period is on taxable dividend income derived from countries, calculated at the rates prevailing in these countries. In accordance with Schedule 6 of the Income Tax Act 1967, profit income earned by the Fund is exempted from Malaysian tax.

A reconciliation of income tax expense applicable to net loss before tax at the statutory income tax rate to income tax expense at the effective income tax rate of the Fund is as follows:

	01.02.2023 to 31.07.2023	01.02.2022 to 31.07.2022
	RM	RM

15. TOTAL EXPENSE AND PORTFOLIO TURNOVER RATIOS

(a) Total Expense Ratio

The total expense ratio for the financial period ended 31 July 2023 is 0.85% (31.07.2022: 0.82%). This ratio represents total expenses expressed as an annualised percentage of the Fund's average NAV, calculated on a daily basis. Brokerage and other transaction fees on financial assets at FVTPL are trades related and are not classified as total expenses.

(b) Portfolio Turnover Ratio

The portfolio turnover ratio for the financial period ended 31 July 2023 is 0.37 times (31.07.2022: 0.40 times). This ratio represents the average of the total acquisitions and disposals of the Fund for the financial period over the average NAV of the Fund for the financial period calculated on a daily basis.

16. SEGMENT INFORMATION

The Manager and the Investment Committee of the Fund are responsible for allocating resources available to the Fund in accordance with the overall investment strategies as set out in the Investment Guidelines of the Fund. The Fund is managed by two segments:

- A portfolio of Shariah-compliant equity securities; and
- A portfolio of Islamic money market instruments.

The investment objective is to provide steady capital gains with consistent income over the medium to long term by investing in a diversified mix of Shariah-compliant instruments. There have been no changes in reportable segments in the current financial period.

17. FINANCIAL RISK AND MANAGEMENT OBJECTIVES AND POLICIES

The Fund maintains investment portfolio in a variety of listed and unlisted financial instruments as dictated by its Trust Deed and investment management strategy.

The Fund is exposed to a variety of financial risks, which include market risk, single issuer risk, interest rate risk, credit risk, liquidity risk and currency risk and Shariah status reclassification risk. The overall financial risk management objective of the Fund is to mitigate capital losses, ensure preservation of value and minimal erosion of capital.

Risk management is carried out through strict adherence to the Manager's internal policies and control procedures and also to the powers and restrictions vested by the regulators as contained in the Securities Commission's Guidelines on Unit Trust Funds ("the Guidelines").

17. FINANCIAL RISK AND MANAGEMENT OBJECTIVES AND POLICIES (CONTD.)

(a) Market Risk

Market risk arises when the value of Shariah-compliant securities fluctuate in response to the activities of individual companies, and general market or economic conditions. The market risk is managed through portfolio diversification and asset allocation whereby the Shariah-compliant securities exposure will be reduced in the event of anticipated market conditions.

(b) Single Issuer Risk

The Fund is restricted to invest in Shariah-compliant securities issued by any issuer of not more than a certain percentage of its net asset value. Under such restriction, the exposure to the Shariah-compliant securities of any single issuer is mitigated.

(c) Interest Rate Risk

The risk refers to the exposure of the Fund's assets to movements in interest rates. In this regards, the Fund's exposure to the interest rate risk is mainly confined to Islamic deposits placement with financial institutions.

Interest rate is a general economic indicator that will have an impact on the management of the fund regardless of whether it is an Islamic unit trust fund or otherwise. The reason for this is because a high level of interest rates will inevitably affect corporate profits and this will have an impact on the value of Shariah-compliant equity and the demand for sukuk.

It does not in any way suggest that this Fund will invest in conventional financial instruments. All the investments carried out for this Fund are in accordance with Shariah requirements.

(d) Credit Risk

Credit risk refers to the ability of issuers and counterparties to honour obligations to make timely payments on profit and principal and proceeds from realisation of investments. This is managed by the internal policy of setting a ceiling or limit to the exposure and also the constant process of credit evaluation to mitigate such risks to an acceptable level.

(e) Liquidity Risk

The Fund maintains sufficient level of Islamic liquid assets, after consultation with the Trustee, to meet anticipated payments and cancellation of units by unitholders. Islamic liquid assets comprise cash, Islamic deposits with licensed institutions and other Shariah-compliant instruments, which are capable of being converted into cash within 7 business days. The Fund's policy is to always maintain a prudent level of Islamic liquid assets so as to reduce the liquidity risk.

17. FINANCIAL RISK AND MANAGEMENT OBJECTIVES AND POLICIES (CONTD.)

(f) Currency Risk

Currency risk is the risk that the value of financial instrument will fluctuate due to changes in foreign exchange rates. The Fund invests in Shariah-compliant securities and other Shariah-compliant investment that are denominated in currencies other than Ringgit Malaysia. Accordingly, the value of the Fund's assets may be affected favourably or unfavourable by fluctuations in currency rates and therefore the Fund will necessarily will be subject to foreign exchange risks.

(g) Shariah Status Reclassification Risk

- Shariah-compliant equity securities

This risk refers to the risk that the currently held Shariah-compliant equity securities in the portfolio of the Fund may be reclassified as Shariah non-compliant in the periodic review of the securities by the Shariah Advisory Council of the Securities Commission ("SAC of the SC"), the Shariah Adviser or the Shariah Supervisory Boards of relevant Islamic indices. If this occurs, the Manager will take the necessary steps to dispose of such securities.

Opportunity loss could occur due to the restriction on the Fund to retain the excess capital gains derived from the disposal of the reclassified Shariah non-compliant securities. In such an event, the Fund is required:-

- (i) to dispose of such securities with immediate effect or within one (1) calendar month if the value of the securities exceeds or is equal to the investment cost on the effective date of reclassification of the list of Shariah-compliant securities ("Reclassification") by the SAC of the SC or date of review ("Review") by the Shariah Adviser or the Shariah Supervisory Boards of relevant Islamic indices. The Fund is allowed to keep dividends received and capital gains from the disposal of the securities up to the effective date of Reclassification or Review. However, any dividends received and excess capital gains from the disposal of the Shariah non-compliant securities after the effective date of Reclassification or Review should be channelled to *baitulmal* and/or charitable bodies as advised by the Shariah Adviser;
- (ii) to hold such securities if the value of the said securities is below the investment cost on the effective date of Reclassification or Review until the total subsequent dividends received (if any) and the market price of the securities is equal to the cost of investment at which time disposal has to take place within one (1) calendar month, excess capital gains (if any) from the disposal of the securities should be channelled to *baitulmal* and/or charitable bodies as advised by the Shariah Adviser; or
- (iii) to dispose of such securities at a price lower than the investment cost which will result in a decrease in the Fund's value.

17. FINANCIAL RISK AND MANAGEMENT OBJECTIVES AND POLICIES (CONTD.)

(g) Shariah Status Reclassification Risk (contd)

- Islamic money market instruments or Islamic deposits

This risk refers to the risk of a possibility that the currently held Islamic money market instruments or Islamic deposits invested by the Fund may be declared as Shariah non-compliant by the relevant authority or the Shariah Adviser. If this occurs, the Manager will take the necessary steps to dispose of or withdraw such money market instruments or deposits.

18. COMPARATIVE FIGURES

The current period's figures and comparative figures are presented as follows:

- The unaudited Statement of Fund Financial Position and its relevant notes are as at 31 July 2023 and 31 January 2023, respectively.
